Python   Django   Flask   MySQL   HTML

CSS

PERSONAL PROJECTS

Multi-Vendor Food E-Commerce Website (Python Django) (12/2022 - Present)
- I making a food ordering e-commerce website with multiple vendors using the Python Django framework. On this website, there is an authentication system, ordering food and tracking system, Razorpay payment gateway system, and multiple food vendors can publish their restaurant's food items and receive orders on their dashboard (vendor's dashboard).
- Source Code:- https://github.com/iamrudra-narayan/multi-vendor-e-commerce-website.git

Video Posting & Blogging Website (Python Django)
- I built a blogging website using Python Django Framework. Using this website, a user can create their account as well as login on this website and see all the posts posted by the users and they also can upload a post of their own as well and publish on this website.
- Source Code:- https://github.com/iamrudra-narayan/IKF-Prime-Video.git

Weather Website using weather API (Python Flask)
- I built this project using weather API and Flask Framework as the backend. On this website, we find real-time weather reports like temperature, humidity, and conditions of particular cities.
- Source Code:- https://github.com/iamrudra-narayan/Cloud-Wheather-Website.git

CERTIFICATES

Data Science Certificate (01/2022 - 07/2022)

Python Full Course Certificate (06/2021 - 12/2021)

ACHIEVEMENTS

SMART INDIA HACKATHON 2022 (03/2022)
I and my group participated a Hackathon i.e. Smart India Hackathon 2022 (SIH) for presenting my IoT based project i.e. Energy conservation by using modern technology and we got a achievement certificate for that.
